FRUIT TREES

Our trees are graded by caliper but in most cases are much taller than the height specified. All two-year trees are headed and branched. We can supply extra well developed two- or three-year-old trees, particularly fine for retail trade, at 5c more per tree.

Write for special quotations on large quantities of fruit trees.

Rich's Double Pink Flowering Peach

RICH'S DOUBLE PINK WEEPING PEACH

This beautiful new flowering peach is being introduced by us this season. The blossoms are a very clear, double, pink of large size. It has long, graceful, pendulous branches. The tree is very vigorous in its habit of growth and has an appealing appearance at all seasons of the year. The above picture is a one-year tree, 4 to 5 feet in height. New growth made during the season shows a very pendulous habit. We feel that this tree fills a very definite place in the flowering tree group, particularly in the family of flowering peaches.
